

GoTEN-tk

孔内局部載荷試験機 (Point Load Tester in borehole)

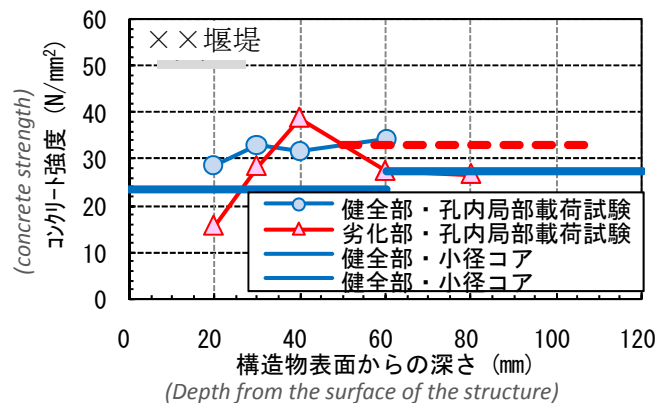

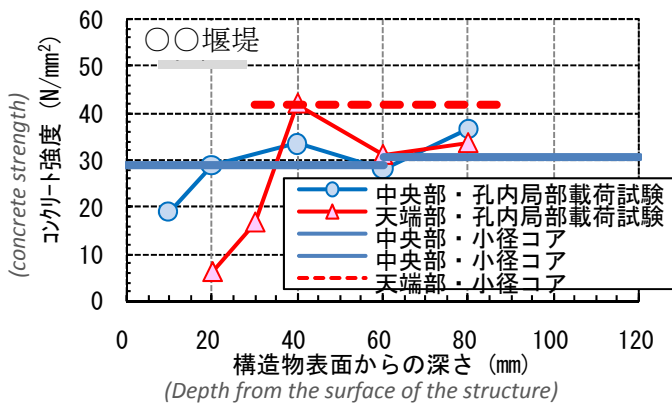

特許 第4584734号

【主な実績 (Notable performance)】

■強度低下範囲の特定 (Identifying the range of the strength degradation)

コア試験では判断できない強度低下範囲を特定
Identifying the range of the strength degradation, which can not be determined by core test

室内試験用のコア試料採取が困難な場合は、原位置で試験実施
When it is not possible to obtain core samples for laboratory tests, the measurement of concrete strength is conducted with GoTEN in the site.
